Chinook Holds Successful Fair

Fair Number of Exhibits And
Quality Good

Good Programme of Sports

The Chinook and District Agricultural Society held its ninth annual exhibition here last Thursday and Friday, and notwithstanding the inclemency of the weather which kept many an interested one away, and somewhat lessened the exhibits, it was one of the best agricultural fairs ever held under the auspices of the society.

The poultry exhibit was not one of the strong classes, but what birds were shown were of fine quality. Mr. Neil McFarlane, of Youngstown, carried away the prizes in the White Wyandotte class, winning two firsts and two thirds.

In the class for grains and grasses were some exceptionally fine samples of grain, showing clearly that while this year has not been an ideal one, yet with good farming it is wonderful what can be produced. In this class for the best sheaf of wheat R. Witt won the first, H. H. George second and G. H. Bradford third.

Some exceptionally fine exhibits in the root and vegetable classes brought forth many expressions of wonder and amazement at the size and quality of some individual exhibits considering the season for garden truck.

There was a large number of entries in the fancy work, every class being well contested and of a quality that made it difficult for the judges to decide which merited the coveted red ticket.

The exhibits in the live stock bespeak an awakened interest in cattle raising in this district. Mr. McNally, who was judging the stock, gave a very interesting and instructive talk on the different points of each animal exhibited, and was listened to with keen interest by the farmers. Mr. McNally, in speaking to The Advance, said that the live stock exhibits shown were of very good quality, and had the weather conditions been more favorable there would have been a larger number of entries.

Among other attractions were the exhibits of the Lacombe Government Experimental Farm under the management of Mr. J. McDonald. Also the model farm house, implement shed, barn, henry and silos which were put on exhibition by the Empire Lumber Co. All these exhibits were most instructive to the farmer and added greatly to the success of the fair.

A good program had been arranged for. The sports consisted of a baseball match between Cereal and Chinook teams, the honors going to Chinook who won by a score of 13-4.

Horse Races

The horse races run off in connection with the exhibition were very good. All the events were

well filled and the finishes were close.

Horse Races

Farmers' Trot—1st, Ralph Squire; 2nd, G. H. Bradford.

Pony Race—1st, S. M. Squire; 2nd, Albert Morris.

Novelty Saddle Race—1st, Sam Squire; 2nd, G. A. Huggard.

Free-for-all Running Race—1st, J. A. Gray, of Cereal; 2nd, J. A. Gray, of Cereal.

Relay Race—1st, G. A. Huggard.

One of the main features of the race was between Wilson and Noble for a purse put up by the latter. This was an exciting race and a close finish, Noble's horse winning by a nose.

Foot Races and Jumps

Half mile—1st, Rufus Davis; 2nd, John Engler; 3rd, Cyrol Bell.

10-yards—1st, J. A. Sully; 2nd, E. Upstone; 3rd, L. Foster.

High Jump—1st, Jim Jingles; 2nd, Joe Engler; 3rd, Mr. Fredslia.

Long Jump—1st, J. A. Sully; 2nd, R. Davis; 3rd, P. Engleish.

Hop-step and Jump—1st, Leo Foster; 2nd, J. Gingles; 3rd, R. Davis.

Putting Weight—1st, M. E. Bird; 2nd, Joe Engler; 3rd, A. Campbell.

Boys' Race, 17 years and under—1st, R. Davis; 2nd, J. Engler; 3rd, J. Gingles.

Boys' Race, 14 years and under—1st, D. Roberts; 2nd, O. Blaney; 3rd, J. Engles.

Boys' Race, 8 years and under—1st, R. Miller; 2nd, K. Miller; 3rd, W. Morrison.

Girls' Race, 17 years and under—1st, A. Gingles; 2nd, M. Todd; 3rd, J. Gray.

Girls' Race, 14 years and under—1st, A. Gingles; 2nd, John Gray; 3rd, A. Gingles.

Girls' Race, 8 years and under—1st, A. Adams; 2nd, Mary Smith; 3rd, O. Adams.

Married Ladies' Race—1st, Mrs. Leaman; 2nd, Mrs. Dressel; 3rd, Mrs. Marr.

Pillow Fight (bboys)—1st, C. Peterson; 2nd, A. Anderson; 3rd, F. Morris.

Pillow Fight (men)—1st, R. Davis; 2nd, C. V. Mason; 3rd, John Engler.

A total of \$6250 was given in prizes for all the foot events.

A List of Judges' awards will be published in next week's issue

Importation Of German Goods

The agitation of importers of German goods against the provision proposed in his budget speech by Sir Henry Drayton, Minister of Finance, that Canadian Customs shall disregard any depreciation in foreign currency greater than 50 per cent, was commented on in a recent interview with the Senior British Trade Commissioner, Capt. E. J. Edwards, of Montreal, with the remark that the prevention of imports of German goods at ruinous prices appeared to be just the aim in putting forward this provision. The German goods being brought in are, moreover, largely goods which are also manufactured in Canada, such as drygoods, fells, silks, etc., not to mention other things, such as cutlery, manufactured in the United Kingdom.

"In allied and neutral countries the belief is general that German banks and other financial interests are artificially depressing their rate of exchange," said Capt. Edwards, "with the object of preventing imports into their country, and assisting them to build up their export trade again at the expense of the allies."

"It is contended by these importers that prevention of German imports will increase the depreciation of the Canadian dollar, by forcing more purchases from the States. Fifteen months ago German imports only totalled \$2,502, but a year later, in February last, the figure jumped to \$522,737. For the 11 months ending February, 1920, German imports (from Canadian Government figures totalled \$20,648, but for the 11 months ending last February they had made another enormous jump, to \$1,395,380. Despite the jump, these figures are still insignificant against Canadian trade with the Mother Country or the States, and I cannot see how Canadian currency will lose in value because German goods are prevented from being dumped at artificially low prices. Such goods as Canada must import can be obtained within the Empire to Canada's better financial advantage than from the States.

"It seems to me it is a question of the Canadian public supporting their own and British manufacturers against German ones," said Capt. Edwards, "and I have no doubt as to their preference. Sir Henry Drayton declared that to prevent financial ruin Canada must purchase more of her own and British manufactures, a statement I thoroughly endorse, and I am sure he did not think it any wiser to import German dumped goods than those of the United States. When Germany realizes the impossibility of exporting goods at sacrifice prices I believe she will quickly straighten out her financial methods, until her currency becomes normal and Canada, in common with other countries, can trade with her on a fair basis."

To Protect Livestock Trade

No Animal May Be Shipped out of Dominion Without a Certificate of Health.

The efforts of the Dominion Department of Agriculture to secure a clean bill of health for Canadian livestock have been unusually successful, it is asserted by officials of the department. No animal, alive or dead, and no product made from the carcass of an animal, may be shipped out of the Dominion without a certificate of the Health of Animals Branch of the Department of Agriculture. These certificates have to be shown and verified both at points of departure and arrival.

Fruit Growing on Prairies

Claim That All Fruits Can Be Successfully Grown in West.

Claim is made by Norman Ross, superintendent of the Dominion Forest Farm at Indian Head, that all fruits can be successfully grown in the province of Saskatchewan. Mr. Ross has grown on the experimental farm apples, plums and hybrid cherries, to say nothing of strawberries, raspberries, currants, gooseberries and other bush fruit. During the present season 3,000,000 or more trees have been distributed to farmers from Indian Head.

Rubber Hesi Output.

American factories last year produced over 115,000,000 pairs of rubber heels—sufficient to supply every man, woman and child in the United States, and the population of Greece besides.

B.C. Lumber For Chili.

The first consignment of lumber to Chile for many years left Vancouver recently, being shipped by T. S. McClay, Harbor Commissioner for Vancouver.

The Spirit of Adventure

Mysteries of the Unexplored Places Ever Beckon the Adventurers.

The bare catalogue of the hopes of the Shackleton expedition may well tempt high-spirited boys into running away to sea, and may turn other men into wishful youths. For what are scholarship examinations, or the counting-house, or even the comfortable armchair that they should not be as dust and ashes compared with the quest for petrified forests, lost islands, and submerged continents? Are not whales and fur seals, unknown birds, the mystery of the Antarctic ice, and lone rocks to serve as wireless relays, better than the dull duties of home? But Sir Ernest has no vacancies; his old and tried companion have hurried to his call. There is nothing for us but to wish him good luck and to look forward to the joy of reading his stories.—London Times.

YOUNG LADIES, READ THIS

If you are bothered with pimples, rashes and ugly blotches on your face, if you are conscious of the fact that you are not as beautiful as you desire to be, that you require Dr. Hamilton's Pills to tone up the blood. One of these splendid regulating pills makes a complexion like peach bloom—checks soon become rosy, eyes brighten, you again look the picture of health, and feel well. Write for your free copy of Dr. Hamilton's Pills of Man Drake and Butternut, 25c at all dealers or The Catarhozone Co., Montreal.

War To End Officially

Setting of Date Will Mean Much to Business.

The date for the official termination of the war, except as regards Turkey, will be September 1. Under the "termination of the present war act" the war could not be declared officially ended for Great Britain until all the peace treaties had been ratified, but it has been decided that the treaty with Turkey might be ignored. The last of the other treaties, that with Hungary, was ratified in Paris recently.

The setting of the date for the official end of the war will pave the way for the settlement of financial transactions outstanding between the Bank of England and the stock exchange and will mean much to certain lines of business.

Hiccup Epidemic Prevalent

"Don't get the habit of hiccups—stop the slightest attack at the beginning. Nothing brings such magical relief as slowly sipping a few drops of Scott's Emulsion in sweetened water. For stomach pains, bloating, cramps, diarrhoea, nothing will prove more useful than every time than a 35 cent bottle of good old Nervine.

Farthest North Police Post

R.C.M.P. Post Is Now Established in Extreme North of Baffin's Land.

A new farthest north R.C.M.P. post has been established at Pond's Inlet in the extreme north of Baffin's Land. This is now the most northerly post held by the force of scarlet riders, the nearest to it being those at Chesterfield Inlet and Cape Barwell at the entrance of Hudson's Straits. A sole staff sergeant will be full police authority at Pond's Inlet and will have full charge of customs and judicial control of Baffin's Land and the territory about it. Only a few Eskimos are to be found there and it is the occasional port of call for traders.

Amber From Manitoba Sands.

For the purpose of recovering amber deposits from the sands on the west shore of Lake Cedar, Manitoba, J. Dix Rogers, of Toronto, has been granted a 21-year lease of about 235 acres. The lease is renewable for a further 21 years, and the lessee pays \$1 an acre per annum and 5 per cent royalty on the value of amber recovered. The lease also provides that \$5,000 must be expended on operations during the twelve months.

Many Agricultural Publications.

During 1920 the publications branch of the Department of Agriculture circulated 2,262,850 publications. This total was made up of 15,719 reports, 243,314 bulletins, 712,911 seasonal hints, 117,092 pamphlets, 168,153 circulars, 27,058 leaflets, 923,316 announcements and 64,745 agricultural gazettes, in addition to posters and mailing lists.

Sciatia, say the medical scientists, may be caused by the habit of sitting perched on the edge of a chair.

Because a girl refuses a young man you needn't suppose it's a sign that she isn't going to marry him.

Equipping a Kitchen

BY LORETO C. LYNCH

An Acknowledged Expert in All Matters Pertaining to Household Management.

Why not look over your entire kitchen equipment with a view to eliminating useless articles?

One woman told me that after an inspection such as I suggest above, she found that she was giving storage to seventeen disgracefully inadequate utensils—and that in a kitchenette.

Once you have decided on the discarded, you will find among the newspaper advertisements many high-class sales for the warm days.

Every housewife has attempted to bake a layer cake only to find the pan sufficiently large to prevent another pan being placed in the oven at the same time. This necessitates baking one layer at a time—not only a waste of time, but of high-costing fuel.

Since you cannot take your oven to the shop with you, the next best thing to do is to take a paper pattern of the floor of your oven with you. The merchant can readily fit the combination to it.

How about some of the new combination aluminum utensils. For instance, the kettle you buy for boiling water may be quickly converted into a double boiler. Then there are triple saucepans. They fit in combination over the one gas burner. By their aid one may cook potatoes and two other vegetables for the meal with the minimum expenditure of fuel.

Many shops are showing combination sets of knives for the home kitchen. Some sets include a small but effective cleaver for the bones that ruin the edge of the unfortunate knife. The spatula or palette knife, a limber knife so useful in removing the last of the batter from bowls or from flipping cakes, is a most useful knife about the kitchen. More than one vegetable paring knife is needed in even a small kitchen.

There are some excellent knife-sharpening machines. And they soon pay for themselves in sharper bills saved and in the joy derived from the use of a really sharp knife. Ask the clerk in your favorite shop to tell you the advantages of each variety.

Of the materials for cook pots, agate, enamelware of the first quality, and aluminum are still amongst the best liked. Buy only a few at first during replacement but buy the best.

A well-equipped kitchen with useful utensils of just the right sort undoubtedly lightens the labor of getting the usual three squares a day.

Asthma's Victims Relieved. To overcome a severe case of asthma try Dr. J. D. Kellogg's Asthma Remedy. Its splendid record is its highest recommendation. By relieving the air passages and restoring natural breathing it effectively aids Nature in combating this distressing and dangerous ailment. To many thousands of Asthma's apparently confirmed victims, the healing fumes of Dr. Kellogg's Asthma Remedy have brought relief.

Atlaswede Clover

New Variety of Red Clover Originated at Edmonton.

A yield of 106 tons per acre of Atlaswede red clover has been harvested on the University Farm, Edmonton, breaking all previous records for clover yields in Alberta. Atlaswede red clover is a new variety originated at Edmonton, and judging from the yields obtained this year, is very successful. At the rate of 106 tons per acre which was the green weight, there will be at least four tons per acre dry weight. The clover stood from thirty to thirty-five inches high and has a very fine stem and makes excellent fodder.

Hungary Signs Peace Treaty

Paper Containing Text Was Printed With Black Borders.

The Trianon Treaty, by which peace between Hungary and the Allied nations was established, became known in Hungary by the publication of the text of the convention. The treaty was printed in a special edition of the official gazette, which bore black borders, and was accompanied by a map showing the present boundaries of Hungary as compared with those of before the war.

Pie Weighs 158 Pounds.

The largest raisin pie on record was served recently to patrons of the automobile show at Turlock, Calif. The immense pie weighed 158 pounds and 75 pounds of raisins were used in its composition.

The Germans prepare an excellent substitute for tea from the common strawberry plant.

Minard's Liniment Relieves Neuralgia

Tanlac Does Just What People Say It Will Do, Declares Calgary Man

"I will never miss a chance to say a good word for Tanlac, especially to my own comrades, many of whom I know are in the same condition I was in after I came out of the trenches," said A. Reff, 1507 Eleventh Street, West, Calgary, Alberta, agent for the Prudential Life Insurance Co., who served in France with the Twenty-Eighth Battalion of Regina.

"I came home from France suffering from stomach trouble, shattered nerves and with my blood in such bad shape my face was covered with pimples. I didn't have any appetite to speak of and I lost weight until I was almost as thin as a rail. What

little I did eat would form gas that bloated me up till I suffered hours of misery.

"I was under treatment and constantly took medicine, but nothing reached my case except Tanlac. I am in tip-top condition to-day, with a big appetite, perfect digestion and nerves that are steady as steel. My blood has cleared up, too, and I am just brimful of life and energy. I feel fine. I am not surprised that people talk about Tanlac so much, for it does just what they say it will do."

Tanlac is sold by leading druggists everywhere.

French-Canadian Settlers

French Farmers From New England States to Farm in the West.

Forty French-Canadian settlers, with their families, arrived in Winnipeg recently en route to farms in the Saskatchewan and Edmonton districts. They came from the industrial centres of New England States, to which they had migrated from Eastern Canada before the war. Most of them were farmers at one time, and they are repatriating to resume their former occupations.

SUMMER COMPLAINTS

KILL LITTLE ONES

At the first sign of illness during the hot weather give the little ones Baby's Own Tablets or in a few hours he will be beyond aid. These Tablets will prevent summer complaints if given occasionally to the well child and will promptly relieve these troubles if they come on suddenly. Baby's Own Tablets should always be kept in every home where there are growing children. There is no other medicine as good and the mother has the guarantee of a government analyst that they are absolutely safe. Baby's Own Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Manitoba Beekeepers

Are Prosperous

Return of \$1,500 In One Season From Thirty-three Hives.

The beekeeping industry is making rapid headway in Manitoba and the outlook for a large honey crop for this year is very bright. Beekeeping demonstrations are being held at different places in the provinces. In the Swan River Valley in Northern Manitoba, J. C. Dodge reports a return of \$1,500 in honey in one season from thirty-three hives. A settler at Dominion City reports that from a stray swarm that came to his farm six years ago he now has seventy-five colonies and last year sold over two tons of honey at 35 cents a pound.

The Error of His Ways.

It was visiting-day at the jail and the uplifers were on deck.

"My good man," said one kindly lady, "I hope that since you have come here you have had time for meditation and have decided to correct your faults."

"I have that, mum," replied the prisoner in heartfelt tones. "Believe me, the next job I pull, this baby wears gloves."—The American Legion Weekly.

Photo Play at Lake of the Woods.

E. Hardcastle, of the Associated Producers, Limited, announces that the company has secured a studio site on an island in the Lake of the Woods district and will commence on the production of Canadian photoplays. It is suggested that this may become the permanent base for the productions of the company.

Western Wool Grades Well.

Alberta range wools are grading out with exceptionally good handling and spinning qualities and are attracting favorable attention by many Canadian mills. Sheep shearing in Southern Alberta is completed.

A safe and sure medicine for a child troubled with worms is Mother Graves' Worm Extremator.

Eggs have been known to fly to a height of 6,000 feet. A lark will rise to the same height, and so will crows. As a rule, however, it is said, birds do not fly at a greater height than 1,000 feet.

CLARK'S

Canadian

Boiled Dinner

And Other Good Things

For Tired Housewives

—No potatoes to peel—no vegetables to prepare—no long cooking over a hot stove—simply heat and serve

CLARK'S CANADIAN BOILED DINNER

a complete and delicious dish well cooked and well seasoned in the great Clark's Kitchen. Like all "CLARK GOOD THINGS" the cost is modest. Good at any time—essential for the unexpected guest. Keep an assortment of "Clark Good Things" on hand.

Made from Canadian Farm Produce and sold everywhere in Canada.

This food builds strength

Maximum nourishment with no burden to the digestion is secured from that famous food—Grape-Nuts.

The nutriment of wheat and malted barley, from which Grape-Nuts is made, builds strength and vigor—and delights the taste.

"There's a Reason" for Grape-Nuts

Settlement Within The Empire Is Urged By Imperial Conference

London.—At the meeting of the Imperial conference the work of the Imperial shipping committee was overhauled and a suggestion to continue the committee under a royal charter was put forward and dropped in the absence of unanimity, it was learned here.

On the question of Empire news services the conference is understood to have contented itself with approving the resolution of the 1920 Imperial press conference at Ottawa on a reduction of press rates.

Among other subjects, the conference, it is believed, adopted an interesting resolution in the direction of an Empire conference of officials with a view to obtaining a uniform system of granting patents.

A series of resolutions dealing with settlement within the Empire was adopted, the South African delegates dissenting from the scheme proposed in view of the limited field for white labor in South Africa.

Will Not Join With Canada

Resolution Introduced in Jamaica Legislative Council for Confederation Is Rejected.

Kingston, Jamaica.—A motion introduced in the legislative council by one of the people's representatives urging confederation between the British West Indies and Canada, was voted down.

During the debate reference was made to the resolution introduced in the United States Senate last February by Senator Reed, of Missouri, inquiring whether Great Britain would be willing to consider the question of the cession of its West Indies properties to the United States.

The representative declared that the people of these British colonies had no intention to become United States citizens and that the proposal made in Washington was resented. The opinion was expressed, however, that everything should be done to foster trade with the United States.

Serious Fires in New Brunswick

Harvesters Taken From Train to Aid Fire Fighters.

St. John, N.B.—Serious anxiety is felt by some residents of the district around Westfield, N.B., because of the condition of the forest fires. Some of the residents have gone so far as to begin packing their belongings in case their 'homes should be in the path of the fire which is raging fiercely. Three forest fires, burning over a six-mile front, are menacing Westfield, Nerepis and Grand Bay. The Canadian Pacific Railway has sent a gang of men from this point to help fire fighters. The railroad has also sent a squad of harvesters bound west to the fire zone.

St. John, N.B.—Over one hundred people have lost their homes and general property damage estimated to be over \$3,000,000 has been caused by a series of big fires in various parts of New Brunswick during the past week. The fires nearly always burned themselves out because of the dryness of the buildings and the water shortage owing to the prolonged absence of rain.

Will Replace Obsolete Vessels With Battle Cruisers of Hood Type

Announcement Made That Policy Cannot Be Construed As A Challenge to Other Nations.

London.—Discussing the naval estimates in the House of Commons, Lieutenant-Colonel L. S. Amery, parliamentary secretary of the admiralty, announced that the four replacement ships the government proposed to build would be battle cruisers of the Hood type armed with 16-inch guns and designed to obviate the need of larger dockyards than at present exist. He declined to say how many guns they would carry on the ground that it was not customary to give such information in advance.

Contending that there was no element of challenge or provocation in this policy of replacing obsolete ships, Colonel Amery said it was simply a policy circumscribed within the narrow limits and postponed to the very last date consistent with the empire's safety.

Alluding to the building programs of the United States and Japan, Colonel Amery argued that the

Final Tribute To Caruso

Funeral of Great Italian Singer Held In Naples.

Naples.—The funeral of Enrico Caruso took place with great solemnity. From the royal church of San Francesco Di Paola, the cortege moved through streets lined with troops and vast crowds to the cemetery, where the body was placed in a vault. Services were held in this famous church by permission of King Victor Emmanuel. A great choir composed of hundreds of singers assisted in the high requiem mass.

There were innumerable floral offerings, among them a wreath from the city of New York. All places of business had been closed as a sign of mourning.

Eulogies were pronounced by the prefect of Naples in the name of the king and the government, by the director of the conservatory and by representatives of the mayor and the artists of the city.

The basilica of the church was draped with black and gold tapestries, some of them royal treasures of the former Kingdom of Naples. The body of the great singer lay on a catafalque in the centre of the structure, surrounded by hundreds of candles. The catafalque covered with black velvet and gold stood in a bower of flowers.

The expenses of the funeral will be borne by the municipality of Naples as a last tribute to a noted son.

Fear Revolution in Portugal

Lisbon Appears to be Centre of the Trouble.

London.—A Reuter's dispatch filed in Madrid states that following rumors from Vigo that a revolution had broken out in Lisbon, a telegram received direct from the Portuguese capital said extreme precautionary measures had been taken in that city. Troops had been brought in from the provinces and held in readiness, the dispatch added, but all was quiet in Lisbon and throughout the country. The troops in Lisbon are said to be confined to their barracks.

Name Armistice Day To Open Conference

Appropriate Occasion to Begin Discussion of Disarmament.

Washington.—Great Britain's willingness to accept any date the Washington administration might desire for the opening of the forthcoming disarmament conference has led to the definite suggestion of November 11, armistice day of this year, as an appropriate occasion.

The matter has been the subject of informal conversations and while no formal announcement was available at the State Department, it was learned that once assured of British acquiescence, United States officials will put the original suggestion of armistice day into definite form for all the invited powers and await a communication from abroad.

The French Government gets \$50,000 a day out of the profits of one gambling casino.

May Reduce Freight Rates

Montreal.—That the Board of Railway Commissioners of Canada will in the near future take steps to reduce the freight rates on Canadian railways, was the announcement contained in a letter received by the local board of trade from Hon. P. B. Carvell, the chief commissioner.

The Montreal Board of Trade recently addressed a resolution to the railway commission asking a reduction on railway freight rates commensurate with the 12 per cent. cut in wages now in effect.

Starving Peasants Going To Moscow

Hunger Stricken People Setting Fire To Homes.

London.—The hunger stricken people in the famine districts of Russia are setting fire to their villages before deserting them for other parts of Russia. Many villages are said to be in flames.

It is also reported that great preparations are being made to deal with the masses of peasants now moving toward Moscow. Many trenches have been dug about the city, and much war material, including field guns, installed.

Telegrams received at Helsingfors reports the Petrograd garrison has mutinied again.

Bush Fires Clear Settler's Land

Made Work of Removing Brush Moderately Easy.

Cobalt, Ont.—According to a settler along the main line of the Canadian National a few miles west of Cobalt, the recent bush fires there were not altogether an evil. The conflagration, while destroying his buildings and hay crop, made the work of clearing an easy proposition.

"At present prices, the cost of clearing one acre of green brush runs close to \$200, but after the fire, when the trees had been felled and piled, I cleaned up two and a half acres for \$20. Generally speaking, a good burn allows the settler in moderate circumstances to go ahead and remove the brush whereas it would be impossible to do so without a fire," the settler said.

Start Aerial Mail in Australia

Will Give Regular Service to Places Otherwise Inaccessible.

Melbourne.—The Federal Government has accepted the £25,000 tender submitted by Major Brerley, of the Australian Royal Air Force, for a weekly aerial mail service between Geraldton and Derby, covering a 1,200 mile stretch of wild country. This, the first official aerial post service in Australia, will start at the beginning of October, and will give a regular mail service to settlements impossible to reach otherwise.

Railway Wage Question

President Hanna Opposed to Submitting Matter To Conciliation Board at Present.

Ottawa.—Claiming that the time is not opportune for the submission of the question of wage reductions, affecting the employees of Canadian railways, to a board of conciliation, President D. B. Hanna, of the Canadian National Railway, has notified the Minister of Labor that he cannot agree to invoking the Industrial Disputes Act for that purpose. Mr. Hanna has pointed out that the agreement which the men have been asked to concur in is only tentative and is subject to revision. He suggests that if the usual meetings and conferences consequent upon permanent schedule adjustment, fail to bring an agreement on the question, it might then be necessary to resort to some form of arbitration.

Baseball Players Not to Play Again

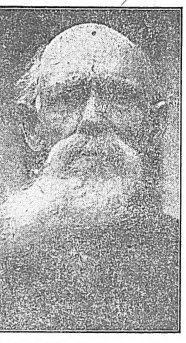

Chicago.—None of the American League players who were acquitted of an alleged national conspiracy to throw the 1919 world series, has any immediate prospect of being reinstated to organized ball, according to a statement issued by Judge K. M. Landis, National Baseball Commissioner.

Emperor Charles Has Hopes.

Geneva.—Unconfirmed reports still persist that former Emperor Charles of Austria, has left Hertenstein secretly, and now is in Hungary awaiting an opportunity to launch a coup d'etat.

Be fair to your local merchants. Ask to see his goods and compare prices before sending your money to the mail order houses. You will find that it pays.

WESTERN EDITORS

J. R. Lowe, Publisher of The Outlook, Chaplin, Sask.

Stockmen Want Assistance

Free Entry of Stock to United States Is Urged.

Calgary.—The present conditions of the livestock industry in Western Canada was the subject of an address by C. W. Peterson, president of the Farm and Ranch Review, at an emergency meeting of the Calgary Board of Trade. The speaker pointed out that every person in Canada had a vital interest in the development of a successful livestock industry; it was the basis and foundation of the entire agricultural structure, he declared.

Mr. Peterson urged that immediate diplomatic discussions should be opened with the United States in order to procure for Canada free entry for animals and animal products. Even an unlimited overseas market, he said, could not for a moment be compared with free access to the Chicago market, which could completely absorb all classes of livestock.

"We are facing an acute situation almost amounting to a panic," he said, "and immediate action is necessary to cope with it."

Rust and Saw Fly Harm Crops

Considerable Damage Has Been Done In Some Sections.

Ottawa, Ont.—Rust and the wheat stem saw fly have caused considerable damage in some sections of the western wheat fields, according to reports on crop conditions at the end of July. In some sections the anticipated yield has shrunk considerably owing to the hot dry weather, but at other points late rains have ensured a heavy yield. Crops will not be uniform, some sections having a bumper yield and others a disappointing one. Harvest is unprecedentedly early owing to the warm and, in some places, very dry weather during July.

Greeks Get Warning

Advance on Turkish Capital Will Not Be Tolerated.

London.—The Allies have warned Greece that an advance on Constantinople by her troops, which are not engaged in war with Turkish Nationalists, will not be tolerated, it was authoritatively stated here.

Great Britain, it was declared, is maintaining strict neutrality between Turkey and Greece.

Italian-Canadian Steamship Service.

New York.—Shipping circles here have been informed that the Navigazione Generale Italiana Line has directed part of its ships into a new Italian-Canadian service. This is said to be the first Italian line which has been established between Italy and Canada. The reason attributed for the move is that Italian navigation lines between the United States and Italy are having great difficulty in finding business for their liners at the present time, due to the enactment of the present United States immigration law.

Famine Condition in Russia

New York.—Russian horses, which numbered thirty-six million before the war, have practically disappeared, having been eaten by the famished population, it was revealed in Russian newspapers published in Moscow and received here by the American relief administration.

Meat had grown so scarce, more than a month ago, that it rationed only to hospital patients. Classes in Moscow University were dismissed because they were too weak from hunger to continue their work, the papers said.

The Life of Ne-Gua-nan-I-sew

By O-GE-MAS-ES (Little Clerk).

(Copyright)

Such a handsome, good natured, bright young Cree Indian when he first traded with me in 1884 and was soon became fast friends and called me another Neshtow, meaning brother-in-law, an Indian term of endearment. He camped at my house a number of times and was the delight of my young children; in fact he always had an interested audience of old and young when telling Indian fables of the beginning of things, most of which I regret to say I have forgotten. How the loon received its handsome coat and power of diving, and the beaver was granted almost human powers of intelligence. In regard to the beaver it was a tradition amongst the Cree that one time they were human beings but having offended the Great Spirit, loss of speech and the human form was taken away from them. Then there was a history for the bear, wolf and worst of all criminals amongst animals the dreaded wolverine who is the terror both of the white man and the Indian trapper.

Neshtow at this time, so he gradually informed me, was very much in love with a pretty Indian maiden called Tannis, a daughter of the South Wind, and on his visits to my trading store I could tell at once if the course of true love had been running smoothly or not, by his good spirits or the reverse. It appeared there was a rival named Ak-e-pen-as who, though a good deal older, was much better off in this world's goods, and consequently appealed more to the young girl's mother. His appearance, however, did not appeal to Miss Tannis at all, owing to the bursting of a gun at his chest bone had been broken which gave him a sinister expression, and further he was a dour natured Indian at the best of times, in fact a complete contrast to sunny tempered Neshtow.

Many South-Wind, however, like Mrs. mothers, was anxious to see her pretty daughter make a good match so there was the opposition of the parents to contend with. Tannis, however, finally brought matters to a show-down by telling Neshtow if he was a man at all they must clope as she positively refused to consider marrying Broken Face, as the rival was commonly called. He came in and told me the whole story and asked what I would do under the same circumstances. Why, take the girl of course, was my reply.

It was the height of the berry season and all the Indian women were busily engaged in picking and drying Saskatoon berries for winter use. The plan was arranged that Tannis was to steal away from her comrades and meet her sweetheart at a place selected, he to have two ponies there. Everything went off smoothly and some days afterwards the newly married couple paid me a visit. There was no wedding ceremony, my dear reader, as these were both Pagan Indians; simply living together made the

It is one of the saddest things to live alone in the wilderness and to be unable to help in times of severe illness, when one realizes with the resources of civilization precious lives might be often saved. Not only when sympathizing with poor Neshtow, but when one's own family needed medical skill that I could give them I took a vow and it was this: That if ever a town grew up in the vicinity of my land there were two things I would try and get built as soon as possible. First, a church for the worship of the only true God, and then a hospital. I am thankful to say I have lived to see them both established.

(To be continued)

Germans Will Help

Ready to Assist Transport of Allied Forces to Upper Silesia.

Berlin.—The French and British ambassadors and the Italian charge d'affaires delivered to Foreign Minister Rosen, on behalf of their respective governments, the note asking the German Government to take requisite steps to facilitate the transport of Allied troops across Germany. The note declares that the situation in Upper Silesia might at any moment render the sending of troops necessary. It was learned later, on good authority, that the Foreign Minister informed the Allied representatives that the German Government stood ready to accede to the demand and would confer with the Minister of Communication regarding the transportation of the troops.

Caruso Leaves Fortune.

London.—Mrs. Caruso will proceed to the United States to look after her husband's estate, according to a Rome dispatch to the London Times, later returning to Naples to make her home there.

Caruso, according to estimates in the newspaper, left a fortune of about 30,000,000 lire. At the normal value of the lire this would represent about the sum of \$6,000,000.

Lays Eggs In Air.

London.—Two crates of valuable chickens which left Orington, Kent, recently at 8 a.m. were rushed to the air station at Croydon to catch the 10 a.m. air express to Amsterdam. At Amsterdam it was found that two eggs had been laid during the journey—the first case on record, it is claimed, of eggs having been laid in the air.

Want Ulster in Peace Plan

Causing Delay in Reply of Sinn Fein to the British Government.

London.—A dispatch from Dublin to the Irish press Association confirms the statement made in Dublin that the delay in the Sinn Fein reply to the British Government on the Irish peace proposals is due to the fact that attention is being made to secure the admission of Ulster to the peace plan. The dispatch expresses the belief that, provided Ulster was disposed to adopt the attitude of give and take, the Sinn Fein would be willing to accept the government's proposals.

Three Men Killed.

Patterson, N.J.—Three men were killed and three seriously injured, the Standard Silk Dyeing Company, when an explosion occurred in a "wash machine" used in drying silk, flew in pieces. The whirling apparatus sprayed the nearby workmen with hundreds of scraps of bronze and iron.

Sweden Wants Canadian Wheat.

Vancouver.—That Sweden is beginning to take an interest in Canadian wheat exports was evidenced in letter enquiring into the possibility of Sweden importing wheat from Canada, from Emanuel Colehen, brother of Stockholm, received by the Vancouver Board of Trade.

Questionnaire of Unemployment

Issued at the request of the Unemployment Conference, Edmonton, July 20th, 1921.

- (a) Organization Campaign Committee.
- (b) District, townships 28, 29, 30, 31, range, half of 8, 7, 6, 5 and as far as half of township 28.
- (c) Address, J. Mawdsley, Esq.
- What number of persons in your district are
 - (a) Out of employment.
 - (b) Suffering from crop failure.
- What number of persons during the winter do you estimate
 - (a) will be out of employment.
 - (b) will be without means of livelihood.
- Do you anticipate any distress in your community during the coming winter?
 - (a) How many cases,
 - (b) of what nature?
- Have you any organization or local means of relieving cases of distress?
 - (a) Will your committee and Red Cross members assist any municipal or government effort which is organized for relieving distress?
 - (b) Is there any public or necessary work which can be undertaken in your district?
 - (c) What authority should carry out that programme?
- Have you any public institutions in your district which have made any effort to prosecute relief work?
 - (a) Give names.

The above questionnaire has been sent to us. Answers are requested from townships 28, 29, 30 and 31, ranges, half of 8, all of 7, 6 and 5. If the secretaries of the various U.F.A. locals would assist in making out such lists it would greatly assist the department that has this work in hand. Kindly send lists to

JAMES MAWDSLEY, Cereal.

Golden Centre Municipal Tax Eight Mills

At the fourth meeting of the municipal council of Golden Centre on Monday, Aug. 1, the general municipal tax was fixed at eight mills.

Assessments for S. D.'s were fixed as follows: Longdale, 1450.00, Adellvale 1405.00, Cop Hill, 1000.00, Sedalia 392.00, Nacora, Farming Valley 980.75, Murray 1300.00, Wildflower, 1000.00, Nebalta 653.54, North el 550.00, Fairacres 1600.00, Vale 1600.00, McConnell 700.00, New Bridgen 576.00, Golden Center 750.00.

H. James was instructed to remove rocks from roadway north of S 31-4, and H. A. Graybiel to remove rocks south of 22-20-4.

Dept. of Public Works was requested to complete lease of road way north of 4-31-4, as per recommendation of Survey or Young Harry Brame was leased S.E. 23-29-4 at a rental payment of current taxes.

John Rogers was appointed Bailiff, with instructions to take such action as necessary to collect from all who are known to be avoiding payment of Seed Grain and Feed Liens, and Secretary was instructed to send to all owing same a copy of Sub. Sections 4 and 5 to Section 10 of M. D.

Seed Grain Act, advising they must be lived up to.

It was decided that approaches to bridges built by the Province be paid by District as a whole. Assessment of S.W. 31-29-6 was lowered to 1500; assessment N.E. 4-29-5, was lowered to 2400 N.W. 4-29-5 to 2320.00, and N.W. 3-31-4 to 1280.00.

By-law No. 26, providing for the prevention of loose wire, open wells, open granaries and loose grain on unfenced land, was read third time and adopted.

A number of accounts were passed for payment.

Secretary read Financial Statement to date which was accepted. Council adjourned to meet again on Wednesday, Sept. 7.

Hatfield Engaged for 1922

The farmers of the Medicine Hat district have decided to engage the services of Mr. C. Hatfield, the rainmaker, for the next year. A new contract was agreed upon in which 3 in. of rain are allowed for natural precipitation during May, June and July, 1922 and Hatfield will receive \$4,000 an inch for every inch over three inches, and up to six inches, the maximum amount to be paid being \$12,000.

Next year it is expected that he will locate about 60 to 70 miles northwest of Medicine Hat.

W. A. Todd Wins Many Prizes

W. A. Todd, the well known breeder of Shorthorn cattle, carried away a number of prizes at the Chinook fair last Friday. For Shorthorns:—Bull 1st, bull calves 1st, 2nd and 3rd two year old heifers 1st, one year old heifers 1st and 2nd, heifer calves 2nd and 3rd. Dry cows 1st and 2nd. In the grades Mr. Todd got a 3rd for dairy cow, and 2nd for beef breed.

OVER FIFTY BUSHELS IN 1920

Expects Thirty-Five in 1921

At a time when the prevailing fashion is to decry the country and its numerous disadvantages, together with the impossibility of raising paying crops under the conditions which we have to face, it is of more than ordinary interest to hear the experiences of R. K. Bohannon, who secured a yield of fifty-one bushels to the acre in 1920, and expects thirty-five bushels this year.

Mr. Bohannon's section farm is situated about fifteen miles south of Sibbald on the edge of Acadia Valley. The land in that district is slightly rolling, free from stone and the soil is of the medium variety, not clay and certainly not light. As for the rainfall, this year at least there has been less in this section than nearer town, one-half inch falling in June and the half-inch drizzle July 2nd, being the only rains of the quarter-inch showers with which the town was favored, nor did they leave the hail.

Under such conditions and to achieve such results, Mr. Bohannon must have dry farmed with a vengeance, and this is precisely what he did. The keystone in the arch of his success is his refusal to deviate from his determination made five years ago to sow no stubble. For this length of time he has sown grain in nothing but summer-fallow and

his summer-fallows are more than ordinarily well-made. He has his own ideas as to how this job should be done and after some years of experimenting he has satisfied himself that the best implement with which to plow is by no means the plow itself, but instead, the duck-foot cultivator. As early as possible in the spring Mr. Bohannon hitches up eight horses to his cultivator and goes across his field about four inches deep. This over, he throws a couple of shovelfuls off the implement and crosses the field about six inches deep, and to complete the job he throws two more shovelfuls away and crosses once again as deep as he can get about eight inches. This method destroys entirely every growing thing and unless some of his neighbors' weeds come over during the winter his field will be completely clean by seeding time. To provide against this last eventuality, Mr. Bohannon is now planning to put a tight fence around his farm.

By using this method, the whole object of the summer-fallow is accomplished. Vegetation is destroyed. No drop of moisture is allowed to nourish weeds and the granular mulch prevents evaporation.

In the spring the drill is operated as deeply as possible, and is followed by the packer and harrow, and that's all. Isn't it easy? Why shouldn't everyone accomplish the same result?

One other thing is necessary, however, in Mr. Bohannon's opinion, and that is the use of Red Bobs wheat. Last year on ground worked identically the same, Marquis wheat yielded 35 bushels while Red Bobs yielded 51 bushels. Nothing can stand the dry weather like Red Bobs.

One of the best points in connection with all this is the fact that the neighbors are trying out these schemes themselves. Seeing is believing, they think, and if such is the case, a trip to this part of the country and a sight of the fine fields without a single weed to be seen, would convince the most sceptical.

While the solution of all our problems may not lie here, the results that Mr. Bohannon is getting should provide thoughtful study to the majority of the farmers in this district who have about decided that the country itself and not their methods, is at fault.

It is in times of trouble such as we have experienced here that with every one casting about for some method of obviating them, that some method is usually found. This one promises to be of great help.—Alaskan News.

Mr. and Mrs. L. E. Ormond, F. J. Ormond and P. Clay, of Hanna, were in town last week renewing old acquaintances.

Mrs. Jas. Rennie returned Saturday from Sinitaluta, Sask., where she has been visiting relatives.

Mr. E. V. Key was down from Hughtenden for the Fair, returning Monday.

Lynn Howarth won the Ingersoll watch given by R. S. Woodruff for guessing the number of nails and watches exhibited in the window during Fair week.

Mrs. S. H. Smith, who has been visiting in Hanna, returned home last Monday.

Mrs. J. W. Lawrence, who has been visiting in the States for the last three months, returned last Friday.

High Average Production Shown By Farm Lands Throughout The Dominion

Whilst Canada comes into open competition with the world in the quality of her agricultural produce of all kinds and can grow on her fertile farms crops of the highest grade, she is unable as yet to enter into competition in the matter of total production. A vast portion of her rich agricultural lands, amounting to many millions of acres, and forming potentially one of the world's great farming areas, is undeveloped and awaits settlement and the plough before producing to capacity in the manner that has made the quality of Dominion crops famous.

Canada can, however, come into active competition with other countries largely agricultural, the United States, for example, with respect to the fertility of her land, its growing qualities and those of the Canadian climate and farming season. Compared to its neighbor, she makes a very fine showing. A comparison between Canadian and United States production for the past three years shows that Canada has maintained a high standard in all the crops she cultivates, and has in the majority of cases exceeded the average achieved by the older producing country.

It is not so long ago since doubt was expressed that it would be possible to grow wheat profitably in Canada. Canadian farmers answered this by taking most of the premier honors for this crop at international exhibitions. Not only that, but it is apparent that the Dominion preserves a higher average production throughout the country in both spring and winter varieties than the United States, taken as a whole. In the year 1920, when the production of spring and winter wheat in the United States was 14.8 and 15.3 bushels per acre respectively, Canada secured an average of 14 and 24 bushels. In the previous year, 1919, with a United States production of 8.8 and 14.9 bushels, Canada's average yields per acre were 9.50 and 23.75. To go back another year, they compared 16.2 and 15.2 as against 10.75 and 19.00, the United States obtaining a greater average of spring wheat in that season.

A comparison of the respective yields of the past three years in oats indicates that Canada, although she secured most of the international honors for the quality of her product, has fallen slightly behind the United States in average production per acre. Whereas in 1920 her average production was 33.50 bushels per acre, that of the United States was 35 bushels. In the previous year, when she produced 26.25 bushels, farmers across the line managed to achieve 29.1 bushels. In the year 1918 the yield stood at 34.7 and 28.74 with the United States in the ascendancy. The same slight difference is recorded in barley, the average yields being 25.6 and 24.75; 22.4 and 21.75; 26.3 and 24.50.

There would appear to be no doubt left as to the greater suitability of Canadian land to potato production after a survey of the comparative figures of production. Against the United States average of 109.6 bushels to the acre last year, Canada produced 170.50. Her yield in 1919 was 153.50 against the '90 bushels reached across the line. When the United States produced 95.9 bushels in 1918, Canada achieved 142 bushels. Slight divergencies only are observed in the hay yield of the two countries, both in the tame and wild varieties. Taking the average of all the hay produced, the United States secured a slightly higher production in 1920 when the yield per acre was 1.34 ton against Canada's 1.30 ton. The advantage is substantially Canada's in the two previous years, however, with averages of 1.55 and 1.40 against 1.36 and 1.15.

A Mediterranean Cruise.

The Canadian Pacific Railway steamer "Empress of Scotland," which was to have been used in the Montreal-Liverpool run, has been chartered to F. C. Clark for his seventeenth cruise of the Mediterranean Sea. The vessel will leave New York, visit the leading Mediterranean ports, stopping eighteen days in Egypt, and return via Liverpool. She is now being refitted in England.

Immigrants From Britain.

During the months of April and May a total of 29,195 immigrants entered Canada, 15,559 being from the British Isles, 8,745 from the United States and 4,891 from other countries.

Still, Small Voice.

"But, Tommy," said his mother, "didn't your conscience tell you you were doing wrong?" "Yes," replied Tommy; "but I don't believe everything I hear."

W. N. U. 1380

Planes To Explore North Arrange Trans-Polar Flight For Scientific Observations.

Plans for a trans-polar flight in September from Point Barrow, Alaska, to Spitsbergen and the North Cape, Norway, are announced by Edwin Fairfax Naulty, of New York. Scientific observation of ocean, ice and air currents will be the chief purpose of the trip, he said, with the hope of establishing the feasibility of the new route for commerce as a secondary consideration. The start will be made from Seattle with a convoy of several planes which will proceed by easy stages up the Alaskan coast to Point Barrow, stopping at Ketchikan, Anchorage and Nome. The Arctic flight will be made by one plane which has already been constructed, carrying four men, including Mr. Naulty. The other three are former service men and it was said their names would be announced soon. Originally, it was explained, it was the intention to make the flight next year but reports of warm weather near the Arctic Circle had led to the advancing of the date.

Fuel was conceded to be the chief problem of the proposed expedition. A supply ample for 50 hours of continuous flight will be carried it was said, and those planning the attempt expressed the belief that this would furnish an excess which would permit short stop-flights at the first landing place on the Polar ice and at the Pole itself. If no landing places are found it is the intention to make the 1,500-mile hop without a stop.

Not Many Immigrants

Immigration This Year Into Canadian West Falls Off.

Immigration into Western Canada for the first six months of 1921 was 33 per cent. less than for the same period in 1920, according to information given out by Thomas G. Kelly, Canadian Commissioner of Immigration at Winnipeg. The total of the new arrivals who came into the west between Port Arthur and the Coast, up to the end of June, was 9,031, being 3,474 less than the same period last year. More than one half of the immigrants came from the United States. Scandinavian countries came next with about one-quarter, and British possessions rank third.

Manless Battleships

Crewless Ships May Be One Of The Wonders Of The Next War.

A photograph of unusual interest has been made public by the U.S. naval department and reproduced in many newspapers. It shows the old battleship Iowa steaming off the coast of Virginia without a soul on board, while army and navy airmen shower dummy bombs on it or at it. The Iowa was controlled and steered from the battleship Ohio, five miles away. Perhaps the crewless battleship will be one of the wonders of the next war.—Edmonton Bulletin.

An Expensive Curfew.

It occurred to someone recently that the curfewing of a cannon at bedtime would be just the proper thing for Calgary, but after consulting the military authorities it was learned that this method of reminding the citizens of their slumber hour would cost the city \$25 a day. The military authorities said they would be willing to put over the nightly barrage. They have only 18-pound guns, and to shoot them, even for the sake of warning the children to go to bed would burn up money too fast. It would mean about \$7,500 a year. The city is considering something cheaper.

Here and There.

"Experiments have shown that it is a good idea to place any special article a storekeeper wishes to push in the window at the left of the main store door." The statement is made in a book called "American Business Methods." The reason given is: "The customer hesitates and generally looks to the left as he opens the door with his right hand." Another strategic point recommended is the store's exit: "A placard should face the customer as he is ready to leave the store."

B.C. Paper For Antipodes.

The movement of paper from British Columbia paper mills to New Zealand and Australia has shown considerable improvement and transportation companies are anticipating yet more increased activity. All ships now sailing from Vancouver carry from five hundred to fifteen hundred tons of paper each.

First Auto Race

Winner Made 53½ Miles in Ten and a Half Hours.

Henry Ford and H. H. Kohlsaat, the veteran Chicago newspaper publisher, were talking over old times recently, when reference happened to be made to the first "horseless carriage" race ever held in America. This race was arranged by Mr. Kohlsaat's newspaper, "the Times-Herald," Thanksgiving Day, 1895, almost a quarter of a century ago. A host of cars were entered—on paper—but less than a dozen were able to reach even the starting point. Others didn't get a hundred yards from the tape line and only three succeeded in getting back, the winner of the first prize making the 53½ mile course in 10 hours 25 minutes. And, at that they had to be given an occasional push up inclines. Nevertheless the event aroused tremendous interest in trade circles and the attendance was large. Henry Ford, however, was not among those present. The reason here are Mr. Ford's own words: "I never wanted to see anything so badly in my whole life as I wanted to see that race. But I was in Detroit and it was in Chicago. The distance was too far to walk, I had my car and I couldn't find anyone willing to lend it to me." Today Mr. Ford is making millions probably more rapidly than any other man in the world, with the exception of John D. Rockefeller.

Dog Followed Master To War Front

Irish Terrier Tracked Private to Trench in France.

Prince, who was one of the most famous dogs in the world, was just died at the home in Stafford, England, of the family of his master, whom he tracked to the battle front in France.

Private Brown, of the Staffordshire Regiment, was ordered abroad in 1914 and left this Irish terrier behind him. A few days after he left home Prince was missed, and a fortnight later he was found in the trenches near Arras, where he tracked his master. After several months at the front, Private Brown was wounded and went into the rear areas and the dog was sent home.

It is calculated that 165,000 tons of soot falls on London every year as the result of the combustion of the 17,000,000 tons of coal Londoners annually consume.

Fortitude Not

Always Heroic

Low Organization, Sometimes Accounts for Resignation to Suffering

In reptiles and certain animals the brain is small, a peculiarity which explains their slight intelligence and the almost entire impossibility of teaching them anything. They can, it is true, be tamed; but although they seem to know individuals, they do not seem to be susceptible of affection; the slight compass of their brain renders them very insensible. This insensibility to pain enables them to support mutilations which would prove immediately fatal to most other animals. A tortoise will continue to live and walk for six months after it is deprived of its brain. It is obvious, therefore, that these kinds of creatures can endure very splendidly that which, in the ordinary way, would be called pain, not because they have fortitude, but because they have insensibility. They remind us in this of many men and women who get great credit for the manner in which they endure the ill of life. Some are praised for their religion, others for their philosophy, others for their magnanimity, when investigation will often reveal the fact that the real reason of their composure is to be found in their low organization.

When a moral hero bears pain with bravery he does so at an immense effort, because, since he has capacity for vast suffering. When a dull and stupid man endures suffering with resignation it is usually because his nature is not endowed with high sensibility. Extremes meet, and he often takes his stand by the hero and is applauded for virtues which he does not possess.

Seven million coins are turned out every week by the British mint. One week's output of coins would, if laid out in a single layer, make a gold, silver and copper carpet ten yards wide and more than a quarter of a mile long.

Getting Back.

"To think that acting should ever come to this!" "To what?" "Just now I heard a moving-picture star refer to the stage as 'the speakers.'"—Youngstown Telegram.

In the days of Babylon the doctor or surgeon who failed of a cure frequently was condemned to have his hands cut off by the public executioner.

To Make A Survey Of The Dry Areas In Two Western Provinces

Produce Trade of B. C.

Chinese and Japanese Getting a Strong Grip on the Trade of the Province.

That Orientals are getting an increasingly firm grip on British Columbia's produce trade is indicated by figures compiled by the Provincial Department of Agriculture. More than 55 per cent. of the potatoes produced in the province are now grown by Chinese.

Most greenhouses around Victoria district are now controlled by Chinese, according to the report. In the Victoria district, Chinese have 193,570 square feet under glass and produce large quantities of early tomatoes, lettuce, other produce and flowers. In Vancouver 90 per cent. of the produce supplied to the markets is produced by Chinese.

In the famous Ashcroft and Lillooet districts, Chinese now own 2,500 acres and lease 1,905 acres more, the report shows. Their holdings in these districts are in blocks, running as high as 400 acres. Recently more sales of land have been made direct from the white farmer, who finds he cannot make production pay, to the Oriental.

Officials of the Department of Agriculture are now investigating records to find out just how land is acquired by the Japanese. Two Japanese in one district were interrogated, says the report, and explained that in acquiring land the system was for the Japanese purchaser to make a selection, and when the purchase was approved by the Japanese Consul the price was paid by that official. Of the 4,500 acres of small fruit in British Columbia, 2,341 acres are controlled by Japanese.

Town Planning Course.

An extension course in town planning will be given at the University of Toronto in the two weeks of January 9 to 21, 1922. Such subjects as housing, health, roads, pavements and model city planning will be dealt with.

If it were possible to collect in a reservoir all the blood pumped by a human heart in one year, that reservoir would be large enough to contain about 1,700,000 gallons of water.

Farming conditions in Western Saskatchewan and Southern Alberta

are to be subjected to an investigation which is expected to have far-reaching and happy results. The first steps looking to this inquiry were taken a few days ago by Vice-President M. A. Brown, of the Western Canada Colonization Association, after consultation with the Saskatchewan board of directors and available members of the Alberta board, Lieutenant Governor Brett, James Ramsey of Edmonton, Pat Burns and General H. P. MacDonald of Calgary, and C. S. Noble of Nohfeldt, Alta.

The inauguration of this survey is in keeping with one of the primary objects of the association which is to improve the lot of farmers already on the land and to retain existing settlers in the country. It is a work which can be carried on while the actual business of colonization is temporarily suspended pending the conference of Provincial Premiers on land listing legislation which is to be called by Hon. T. C. Norris once the new Alberta Government is actually seated in office.

Its promoters believe that the decision to look into prevailing conditions in the south country will undoubtedly have the enthusiastic and unanimous backing of all the governments, legislators and other public men, as well as of the bankers, the mortgage and loan companies, the implement dealers and other business men. The Premier of Saskatchewan, the outgoing and incoming premiers of Alberta and other cabinet ministers in both provinces are heartily lending their aid.

Oil Wealth of Northland

Oil, Gas and Coal Is Found To Exist Over Wide Area.

The whole of the Canadian north from Fort Norman into the Arctic and the Mackenzie basin seems to be underlain with oil, natural gas and coal, declares Howard Colley, who returned from that district recently, after staking claims. In many places the oil is boiling up out of the ground in natural wells, he said. There are coal seams projecting almost everywhere and in some places whole cliffs are exposed. Mr. Colley said the coal is not a hard variety, but seems to be good bituminous coal. Natural gas is almost as common.

In the northern part of the district the Eskimos are using the natural gas. There are soft earth formations into which they poke long sticks which they twist around. Gas comes out of the hole thus formed. They light it and have a flame for cooking. "But no one thinks of gas or coal up there," Mr. Colley went on. "It is only the oil they are after. They do not have to bother about going out and breaking off pieces of coal for fuel in their shacks. All cooking and heating is done by oil piped from the wells. As it comes from the well at Fort Norman the oil is like kerosene. After it was strained through a mouse hide it ran a gasoline engine.

Utilize Arctic Wastes

American Comment on the Reindeer Project in the North.

The Canadians are a thrifty people, says the Cleveland Plaindealer, but they have not, until recently, suggested a practical way to get any return from their tremendous possessions. Now one suggestion of peculiar merit has been made, and is to be acted on. Reindeer are to be introduced in several localities where there is a good chance of their becoming naturalized. The Alaska reindeer experiment has proved so great a success that the Canadians are determined to repeat it on a much larger scale. With reindeer well established, Canada will have a new and important source of meat supply. This, probably, is the chief consideration. But of scarcely less importance will be the service of the reindeer as a means of opening up new regions. Winter or summer the animals may be used in harness.

Decrease of Britain's Foreign Debt.

Great Britain's external debt now amounts to £1,161,563,000, a decrease for the year ending March 31 of £117,151,000, an official return states. The chief creditors are the United States, £972,704,000 and Canada £53,339,000.

The Library of the General Theological Seminary in New York

contains more than 1,200 different editions of the Bible.

Patronize your local merchant and thereby help to build up your home town and community.

DISTRIBUTING IMMIGRANTS

A family group of settlers in Canada.

Two thousand immigrants have arrived in a single day at the port of Quebec. They have landed from three Canadian Pacific Ocean Liners; they have been inspected, examined and docketed by officials and inspectors—government and railway; their foreign money has been exchanged for Canadian currency, what remains is the process of distribution and assimilation?

Two thousand crowd the Government Immigration Hall, waiting to make another leg of their long journey.

They have come from Everywhere and are going to Everywhere. The map of Europe and of the British Isles are represented in this mass of humanity—sturdy Scandinavians from Northern Europe, dairy workers from Denmark, Poles by the group and family, fleeing from their war-torn country, all the new Little Lands created by the League of Nations have contributed of their sons, as all the Central European countries in Ukrainian, Ruthenian, Czech, Slovak and Russian. Switzerland and Italy are also represented in the composite crowd, all making a human

inflow of a day that illustrates the mixture of races in this land of promise.

Another shipload follows those of the Corsican and Tunisian. The Melita brings an exclusively British army of immigrants, the latter covering the British Isles as the foreigners of Europe, while all the way from John O'Groats to the Land's End is heard from.

The government is through with them and the Canadian Pacific Railway practically takes charge. Both unite in directing the big crowds to their respective trains. Long lines of cars—tourist, colonist and coaches—parallel the hall, each clean and well-attended for their occupation. Big panting locomotives are ready for their task. A large staff of officials and trainmen are on their job, keeping their heads as well as their tempers under strong temptation to those both. Some of the newcomers are nervous and frightened, some are excited and fussy, and some are "fickleless" in the word of a Scotch observer. Perhaps we would be, too, if we were in their place, a long way from home and not quite sure of tomorrow.

Carefully and cleverly the passengers are stowed away—the westward-bound in trains that will head direct for Winnipeg and all beyond to the going down of the sun; the Ontario ones are in trains billed to Toronto, for redistribution from that centre. Families are given cars to themselves, women folks are treated the same, and the single men have other cars to themselves, flocking together like birds of a feather. Many groups formed during the voyage and that have the same destination, are also permitted to keep intact.

The women-filled cars are in charge of trained government "conductresses" who render a sympathetic service in a hundred ways that only travelling women and girls can appreciate, especially where babies are present, as they are most numerous. Thus train after train is filled, but not more than to capacity, and starting on a new experience in a new land for a majority of them, and as Quebec city is circled, and the old province is entered, the largest in all Canada, passing the quaint farmsteads of the habitants, all eyes are centred on the landscape and the New World.—F. Y.

Oh, Money! Money!

— BY —

ELEANOR H. PORTER

Printed by Special Arrangements with Thos. Allen, Toronto, Ont.

(Continued)

"Oh, it's only Mr. Smith!" With a look very like annoyance Mrs. Blaisdell advanced and held out her hand. She looked pale, and her hair hung a bit untidily about one ear below a somewhat twisted pyramid of puffs. Her dress, though manifestly an expensive one, showed haste in its fastenings. "Yes, I heard voices, and I thought some one had come—a caller. So I came down."

"I'm glad—if you're better," smiled Miss Maggie. "Then I'll go, if you don't mind. Mr. Smith has come to ask you some questions, Hattie Good-bye!" With another cheery smile and a nod to Mr. Smith, she disappeared into the house. A minute later Mr. Smith saw her hurrying down a side path to the street.

"You called to ask questions?" Mrs. Blaisdell sank languidly into a chair. "About the Blaisdell family—yes. But perhaps another day when you are feeling better, Mrs. Blaisdell." "Oh, no," she smiled a little more cordially. "I can't wait to see you as well as any time—though I'm not sure I can tell you very much, ever. I think it's fine you are making the book, though. Some day it gives our family such a standing, to be written up like that. Don't you think so?" And the Blaisdells are really a very nice family—one of the oldest in Hillerton, though, of course, they haven't much money."

"I ought to find a good deal of material here, then, if they have lived here so long." "Yes, I suppose so. Now, what can I tell you?" she asked. "I can tell you about my own family. My husband is in the real estate business. You know that, didn't you? Perhaps you see 'The Real Estate Journal.' His picture was in it a year ago last June. There was a write-up on Hillerton. I was in it, too, though there wasn't much about me. But I've got other clippings with more, if you'd like to see them—where I've poured, and been hostess, and all that, you know."

Mr. Smith took out his notebook and pencil.

"Let me see, Mrs. Blaisdell, your husband's father's name was Rufus, I believe. What was his mother's maiden name, please?" "His mother's maiden name? Oh, 'Elizabeth.' Our little girl is named for her—Bessie, you know—you saw her last night. I don't want to let it. It's a pretty name—Elizabeth—still, it sounds a little old-fashioned now, doesn't it? Of course we are anxious to have everything just right for our daughter. A young lady soon coming out, so—you can't be too particular. That's the reason why I wanted to get over here—on the West Side, I mean. Everybody who is anybody lives on the West Side in Hillerton. You'll soon find that out."

"No doubt, no doubt! And your mother Blaisdell's?" "Oh, well, it's not so interesting in one's business, you know."

"But such a business!" murmured the lady, with another shrug. "Then you can't tell me Mrs. Rufus Blaisdell's surname?" "No. But Jim—Oh, I'll tell you who will know," she broke off interestedly. "And that's Maud Duff. You saw her here a few minutes ago, you know. Father Duff's got all of Mother Blaisdell's old-fashioned ways. Oh, Maggie can tell you a lot of things. Poor Maggie! Benny says if we want anything we ask Miss Maggie, and I don't want but he's right. And here I am, sending you to her, so soon!"

"Very well, then," smiled Mr. Smith. "I don't see but what I shall have to interview Miss Maggie, and Miss Flora. Is there nothing more, then, that you can tell me?" "Well, there's Fred, my son. You haven't seen him yet. We're very proud of Fred. He's at the head of his class, and goes to college, and is a lawyer. And that's another reason why I wanted to come over to this side—on Fred's side, I mean. We think we're going to have Fred a big man some day."

"And he was born, when?" Mr. Smith's pencil was still poised above an almost entirely blank page.

"He's seventeen. He'll be eighteen the next month."

"And Miss Bessie, and Benny?" "Oh, she's sixteen. She'll be seventeen next winter. She wants to

Stops Bronchitis Quickly, Helps Irritable Throat, Ends Sneezing, Coughing

Relief comes at once when you breathe in the soothing vapor of Catarrhozone. Once its healing, piny essences strike the bronchial tubes, you realize that a powerful treatment is at work. Irritation can't live in the throat of a person inhaling Catarrhozone. It is so soothing to warming, so full of concentrated healing power that you get results at once. Catarrhozone strengthens the weak throat, stops the cough, removes that hacking, irritating necessity to clear the throat, makes even the chronic cough, which at last he has discovered a real friend. For coughs, colds, catarrh and winter ills, nothing in the family could be better than the complete dollar outfit. Small size 50c, trial size 25c, all dealers or the Catarrhozone Co., Montreal.

come out then, but I think I shall wait a little. She's a very young thing, Gussie Pennock's out, and she's only seventeen, and the Pennocks are some of the very best people. They're the richest folks in town, you know."

"And Benny was born—when?" "He's eight, or rather next Tuesday. Dear me, Mr. Smith, don't you want anything but dates? They're tiresome things, I think—make one feel so old, you know, and it shows up how many years you've been married. Don't you think so? But maybe you're a bachelor."

"Yes, I'm a bachelor."

"Are you, indeed? Well, you miss a lot, of course—home and wife, and children. Still, you gain some things. You aren't tied down, and you don't have so much to worry about. Is your mother living, or your father?" "No. I have no nearer relatives. Mr. Smith stirred a little uneasily, and adjusted his book. "Perhaps, now Mrs. Blaisdell, you can give me your own maiden name."

"Oh, yes, I can give that!" She laughed and bridled self-consciously. "But you wouldn't ask her, would you? For I shan't tell you, if you do. My name was Hattie Snow."

"Harriet, I presume," Mr. Smith's pen was busy on the page. "And the Snows were just as good as the Blaisdells, if I do say it. There were a few Snows in that part of the country, but Mr. Smith," she laughed, and bridled again self-consciously. "But I told Jim. He was handsome then, very dark eyes, dark hair, and so dreamy and poetical-looking; and I looked like a girl that hadn't set her cap for him. And he's been a good husband to me. To be sure, he's kept so ambitious as he might be, perhaps. I always did believe in being somebody, and getting some money. Don't you? But Jim—he's always for hanging back and saying how much it'll cost. Ten to one he doesn't end up by saying we can't afford it. He's like Jane—Frank's wife, where you board, you know—she's a little bit of a miser. I've never thought of being so. She won't spend but five cents, if she can help it. Now I believe in taking some comfort as you go along, but Jane—she's a great saver! I ever did see. Better look out, Mr. Smith, that she doesn't try to save feeding you at all!" She finished merrily.

"I'm not worrying," Mr. Smith smiled cheerily, snapped his book shut, and looked at his hostess. "Oh, won't you wait for Mr. Blaisdell? He can tell you more, I'm sure."

"Not to-day, thank you. At his office, some time, I'll see Mr. Blaisdell," murmured Mr. Smith, with an odd haste. "But I thank you very much, Mrs. Blaisdell," he bowed in farewell.

CHAPTER V.

In Miss Flora Blaisdell.

It was the next afternoon that Mr. Smith inquired his way to the home of Miss Flora Blaisdell. He found it to be a small, white cottage on a side street. Miss Flora herself answered his knock, peering at him anxiously with her near-sighted eyes.

"Mr. Smith, I'm glad to see you. I'm sure I'm glad to tell you anything I know," she beamed, ushering him into the "mistakeably" little sitting "front room." "But you really ought to go to Maggie. I can tell you some things, but Maggie's got the Bible, and she'll tell you everything. Poor Maggie! She tried to get 'em for us; but, merciful she never tried but once. But I've an idea of your father's family."

Miss Flora, plainly pleased, but flustered, stepped back for him to come in.

"Oh, Mr. Smith, come in, come in! I'm sure I'm glad to tell you anything I know," she beamed, ushering him into the "mistakeably" little sitting "front room." "But you really ought to go to Maggie. I can tell you some things, but Maggie's got the Bible, and she'll tell you everything. Poor Maggie! She tried to get 'em for us; but, merciful she never tried but once. But I've an idea of your father's family."

As she spoke she picked up from the table a little photograph album. Seating herself at its side she opened it, and began to tell him of the pictures, one by one. "She did, indeed, I quite a lot of most of them. Tintypes, portraying stiffly held hands and staring eyes, directly representative of stern-tipped men and women, in old-time dress and kerchiefs; photographs of stilted family groups after the 'middle-class' and 'middle-class' variety; snapshots of adorable babies with blurred thumbs and noses—never had Mr. John Smith seen their like before."

Politely he listened. Busily, from time to time, he jotted down a name or date. Then, suddenly, he turned a page, he gave an involuntary start. He was looking at a pictured face, evidently cut from a magazine.

"Why, what—who—" he stammered.

"That? Oh, that's Mr. Fulton, the millionaire, you know. Miss Flora's hands fluttered over the page a little importantly, adjusting a corner of the print. "You must have seen his picture. It's been everywhere. He's our cousin, too."

"Oh, is he?" "Yes, 'way back somewhere. I can't tell you just how, only I know he is. His mother was a Blaisdell. That's why I've always been so interested in him, and read everything I could—in the papers and magazines, you know."

"Oh, I see," Mr. John Smith's voice had become a little uncertain. "Yes, he isn't very handsome, is he?" Miss Flora's eyes were musily fixed on the picture before her. "He was well, perhaps. Mr. John Smith's face was a study just then. "Er—no, he isn't."

"But he's terribly rich, I s'pose. I wonder how it feels to have so much money."

There being no reply to this, Miss Flora went on, after a moment's pause.

"It must be awful nice—to be what you want, I mean, without fretting about how much it costs. I never did. But I'd like to."

"What would you do—if you had the money, I mean?" queried Mr. Smith, almost eagerly.

Miss Flora laughed. "Well, there's three things I know I'd do. They're silly, of course, but I wonder what I would do with a photograph, and to see Niagara Falls, and to go into Noel's restaurant and order what I want without even looking at the price after 'em. Now you're laughing at me!"

"Laughing? Not a bit. Her face looked suddenly pinched and old. "I shan't. I couldn't, you know. Why, if I had the money, I shouldn't spend it—not for things like that. I'd be needing shoes or a new dress. And I couldn't be so rich I wouldn't notice what the prices were—of what I ate. But, then, I don't believe anybody's that not even him."

She pointed to the picture still open before them.

"No," Mr. Smith, his eyes bent on the picture, was looking thoughtful. He had the air of a man to whom has come a brand-new some what disconcerting idea.

Miss Flora, glancing from the man to the picture, and back again, gave a sudden exclamation.

"There, now I know who it is that you remind me of, Mr. Smith. It's him—Mr. Fulton, there."

"Oh, what?" Mr. Smith looked a little startled. "I know."

"Something about the eyes and nose," Miss Flora was still interestedly comparing the man and the picture. "But then, I don't know. You're a Blaisdell yourself. Didn't you say you was a Blaisdell?"

(To be continued)

Camera Used To Detect Forgery

Enlarged Photo Shows All Irregularities and Imperfections.

Few people are aware that in detecting forgeries the camera plays a highly important part.

The photographic record, duly enlarged, shows the smallest inaccuracies—"joins" in the middle of letters, inequalities in the strokes, and a hundred and one other imperfections of the kind.

The best advice that can be given to those whose signatures is likely to be appended to important documents is that they should adopt a plain, straightforward style.

The down strokes should not be made too thick and the name should always be written in full. "J. Jones" is obviously easier to forge than "John Thomas Jones" or "John Jones."

And in signing a document that is likely to be questioned later on, do so if possible when you are feeling "fit." Very few people realize the extent to which health is reflected in handwriting.

In one case two signatures, supposed to be by the same person, were so dissimilar that one was thought to be a clumsy attempt at forgery. Yet, as the expert was able to prove, both were written by the same man, the man when he was in perfect health and the other when he was ill.

The difference in the signatures nearly resulted in his losing property of considerable value.

Free Access To U. S. For Canadians

Passports, Identity Cards and Border Permits Not Required.

An executive order promulgated at Washington provides that citizens of Canada, Newfoundland, Bermuda, St. Pierre and Miquelon may enter the United States from those countries without presenting passports or identity cards. The order also discontinues the issue of border permit cards to aliens either for departure from the United States or for entry therein through Canadian border ports.

Boring For Oil In Manitoba.

The test well being bored at Winnipegosis, Man., is down to a depth of 430 feet and slight indications of oil have been discovered. Boring will be continued until definite results of some kind are obtained. The provincial well boring department is also at work on wells at many other Manitoba points.

Turkish Joan of Arc

Leads Fighting Sisters and Believes She Is Inspired.

A Turkish Joan of Arc, Aishe Hanum, has started a woman's fighting brigade against the Greeks. Her organization, called the Kadiri Brigade, has already taken part in active fighting and she is constantly enrolling new recruits.

This is the first time in Turkish history that a woman has been so militantly active. She has been dubbed by the people of Anatolia, "The Conqueror." Her personality is in distinct contrast to the beautiful Halide Edib Hanum, the writer and graduate of the American Constantinople College, who has been so active in Nationalist politics for two years and fled to the interior in March, 1920, to escape imprisonment by the Allies.

Aishe Hanum is a stern, dark woman of the soil, aged 52, who sees visions and believes she is inspired by the Prophet. She wears a veil but has cast aside skirts. She carries a rifle and when not at the front goes through the villages accompanied by her fifteen-year-old son, urging the peasants to contribute food and money and their able bodied women to cast out the enemy stranger from the homeland.

As Nationalist soldiers the uniform of the Kadiri Brigade corresponds to that of its leader.

Indirectly Aishe Hanum is doing as much as Halide Hanum to emancipate the Turkish women. When she began her work the Turkish men, who dislike to have women interfere in politics, tried to force her to return to her farm. But, by the courage born of her visions Aishe Hanum has continued until she is recognized as an aid to the Nationalist cause.

Justice Is The Strength of Law

Credit Due to English People's Obedience to Authority.

The Amir of Katsina, with his wives, sons and followers, has just been profoundly impressed by the power of the point duty policeman in Manchester, which he thought the most wonderful thing he had ever seen. To be able to stop half a mile of traffic by the lifting of a hand!

This authority of the policeman never fails to magnetize foreign people who visit us. And yet the power for which he is renowned and exalted does not dwell in the hand or the blue-clad person of the constable. The credit is due to the English people's obedience to authority, and to the law behind that authority, and to what they recognize as the justice behind the law—Vexatus in Sunday Chronicle, London.

New Battleships

Naval Situation Justifies Britain In Plans For Building.

The British Government has not changed its plan to build four new battleships. The arranging of the "disarmament" conference will not, according to Premier Lloyd George, interfere with their construction. No one knowing the naval situation will be surprised at the government's attitude. The United States and Japan are not altering their naval construction programmes because of the conference, and the British navy will be much under the one-power standard in 1924 unless the new ships are built.

The Old Lady's Fears.

Orville Wright was talking at a Dayton dinner about the new Caproni biplane which carries 100 passengers. "What will the scientists say now?" he laughed. "When my brother and I were trying to fly, scientists proved time after time that flight was impossible to man. Afterwards, when flying was actually accomplished, they proved that airplanes would never be more than dangerous toys; big, stable ones couldn't be made; they'd be too heavy to rise. Those scientists were like the old lady who was taken to see the first trolley car to start in her village. She looked at the car and sniffed: 'It'll never go.' But the car did go. It went beautifully. Then the old lady, starting after it, shrieked: 'It'll never stop.'"

Says Russia Needs Soap.

"Liel! Every one in Russia is full of them. The most pressing need of Russia is not locomotives, but ten million tons of soap." So writes an American correspondent, recently freed from Russian prisons, where his experiences draw from him the statement that the most serious and widespread act of the Bolshevik regime is not the spectacular acts of Red terror here and there, but the chaining up of thousands of human being in steel cages all over Russia and denying them food and ordinary comforts.

Nothing Succeeds Like the Officeholder's Successor.

Children Cry for Fletcher's

CASTORIA

Fletcher's Castoria is strictly a remedy for Infants and Children.

Foods are specially prepared for babies. A baby's medicine is even more essential for Baby. Remedies primarily prepared for grown-ups are not interchangeable. It was the need of a remedy for the common ailments of Infants and Children that brought Castoria before the public after years of research, and no claim has been made for it that its use for over 30 years has not proven.

What is CASTORIA?

Castoria is a harmless substitute for Castor Oil, Purgative, Drops and Soothing Syrup. It is pleasant. It contains neither Opium, Morphine nor other narcotic substance. Its age is its guarantee. For more than thirty years it has been in constant use for the relief of Constipation, Flatulence, Wind Colic and Diarrhoea; allaying Feverishness arising therefrom, and by regulating the Stomach and Bowels, aids the assimilation of Food, giving healthy and natural sleep. The Children's Comfort—The Mother's Friend.

GENUINE CASTORIA ALWAYS

Bears the Signature of

Chas. H. Fletcher

In Use For Over 30 Years

THE CENTAUR COMPANY, NEW YORK CITY

Powdered Milk Factory Paper Mill for Prince Rupert

Plant at Chilliwack Will Have a Capacity of 40,000 Pounds of Milk Daily.

Construction of First Unit of Two Hundred Ton Per Day Mill.

It is now definitely announced that the Prince Rupert Pulp and Paper Company will go ahead at once with construction of the first unit of its two hundred ton per day sulphate mill, having an initial output of forty tons per day. This company recently purchased the British Columbia holdings of the North Empire Timber Company, approximately 1,000,000 feet, of which fully ninety per cent. is spruce and hemlock.

A Frog That Barks.

Mark Twain gained fame with a jumping frog, and J. M. Miller, who runs the florist shop in New York hotel, is prepared to do the same with a barking frog. This one comes from Mexico, and is guaranteed to bark like a dog, especially at strangers he does not like.

Threshing Machines For Palestine.

A large shipment of threshing machines to Palestine is being made by Sawyer-Massey Company, of Toronto. An order amounting to about \$40,000 has also been received from Kingston, Jamaica, for road machinery.

PIPE OF HECLA MELLOWAIR FURNACE

The HECLA heating plant is the simplest because it hasn't an unnecessary part—that's why it saves so much fuel.

TORONTO, CANADA

World Happenings Briefly Told

Dear trapping is now prohibited in British Columbia, and only three bears may be shot in one season.

A new telephone transmitter, held to the throat instead of the mouth, eliminates outside noises.

There are now 599 newspapers and periodicals published in the province of Ontario, as against 745 before the war.

Machine betting at Brighouse Park, Vancouver, this year will be supervised by the Royal Canadian Mounted Police.

Nelson, B.C., city council have established a municipal motor camp, equipped with shade, electric light and cooking facilities.

Canada has the largest forest in the world. It is in the Labrador and Hudson Bay district, and is, roughly, 1,000 by 1,700 miles.

Resumption of diplomatic relations between France and the Vatican have been formally effected after a break that has existed since 1904.

A bumper apple crop will be gathered in British Columbia this year, according to present indications. This year's opening prices are fifty cents a box under those of last year.

Ralph M. Haynes, an aviator, was fined \$50 at Chelsea, Mass., for flying his airplane so as to endanger the lives of persons, because he was flying over a city.

The 19,300 ton liner, Tirpitz, built in Germany during the war and completed shortly after, has been purchased outright by the Canadian Pacific Railway and will be added to its Pacific ocean fleet. She will be renamed the Empress of China.

THIS WOMAN'S RECOVERY

Shows Remarkable Restorative Power of Lydia E. Pinkham's Vegetable Compound.

Chesley, Ont.—"Before using Lydia E. Pinkham's Vegetable Compound I was a total wreck. I had terrible pains in my sides and was not regular. Finally I got so weak I could not go up stairs without stopping to rest half way up the steps. I tried two doctors but they did me no good. I saw your medicine advertised in the newspapers and thought I would give it a trial. I took four bottles of the Vegetable Compound and was restored to health. I am married, am the mother of two children, and do all my housework, milk eight cows, and do a little bit of work and enjoy the best of health. I also found Vegetable Compound a great help for my weak back before my babies were born. I recommend it to all my friends who are in need of medicine, and you may print this letter if you wish."

Mrs. Henry James, R. R. No. 4, Chesley, Ontario.

It hardly seems possible that there is a woman in this country who continues to suffer without giving Lydia E. Pinkham's Vegetable Compound a trial after all the evidence that is continually being published, proving beyond contradiction that this great old medicine has relieved many suffering women from any other medicine in the world.

W. N. U. 1380

An Artist's Luck

Won Valuable Prize When Ill and Without Funds.

Frank Schwartz, twenty years old, trying to make his living as an artist was notified by his landlord, that he must leave his stuffy room in a tenement over a saloon in the East Side, New York, unless he paid his rent, \$10 a month. On his way out he met the postman with a letter informing him that he had won the Prix de Rome, offered by the American Academy in the Eternal City. The prize gives him free transportation to Rome, free tuition in art, and an allowance of \$1,000 a year for three years.

The vicissitudes of an artist's life could scarcely be better illustrated. His mother died in Chicago when he was twelve years old, and his father, who was a hotel waiter in that city, left the boy to shift for himself because he insisted upon studying at the Chicago Art Institute instead of going into business where he could make money. It is not known how he managed to struggle along in the interval, but letters found in the boy's apartment showed he was desperate for lack of money. After leaving the army, with which he served in France as a member of the Camouflage Section, he was stricken with pneumonia. He was unable to work. Doctors advised him to leave the city. He could not do so; he had no funds. Then came the notice, sent by the agent for the tenements. And then the prize—Toronto Globe.

For Catarrh—It is one of the chief recommendations of Dr. Thomas' Electric Oil that it can be used internally with as much success as it can outwardly. Sufferers from catarrh will find that the Oil when used according to directions will give prompt relief. Many sufferers from this ailment have found relief in the Oil and have sent testimonials.

To Slaughter Buffalo

Said That One Thousand Animals at Wainwright Will Be Disposed of by Government.

Owing to the increase in the buffalo herd at Wainwright, one thousand and of these animals are to be slaughtered. A special building is being erected for the purpose. The buffalo meat will be sent to all points over the country for sale. A strict account is being kept of all heads and skins, which will probably be disposed of by the Dominion Government. The Wainwright reservation contains the last large herd of buffalo in the world, with about 3,000 animals.

Thinks Swearing All Right

Eyes, providing the provocation called for. A special building is being erected for the purpose. The buffalo meat will be sent to all points over the country for sale. A strict account is being kept of all heads and skins, which will probably be disposed of by the Dominion Government. The Wainwright reservation contains the last large herd of buffalo in the world, with about 3,000 animals.

Advantages of Irrigation

Taber System Will Be Paid For In One Year By Increased Production.

Paying for an irrigation system in one year is the unique experience of the Taber project comprising 17,000 acres, just east of the irrigated area operated by the Canadian Pacific Railway. It cost sixteen dollars an acre to build the ditches and laterals and conservative estimates of the average yield on the 13,000 acres under crop are twenty bushels to the acre as against eight bushels on the dry land adjoining.

This is the first year that the Taber project has been in operation and farmers are naturally enthusiastic over its success. The many fields with thirty-five and forty bushel crops are, however, the most satisfactory evidence.

Patronizing Local Industry.

A profitable market for the product of sodium chloride is being developed by the Senlac Salt Company, which is engaged in developing the salt deposits at Senlac, Saskatchewan. A Calgary soap factory is utilizing the product extensively in its manufacture, instead of importing from Wisconsin as previously, and it is probable the wants of their Winnipeg branch will be supplied from the same source.

Alberta Coal Production.

Production of all classes of coal in Alberta during 1920 amounted to 7,010,845 tons, valued at \$33,919,240, the highest in the coal mining history of Alberta. Of the total production 130,594 tons were anthracite, 3,419,921 bituminous, 3,359,308 domestic coal and 101,922 briquettes.

It pays to patronize home industry. Buy from the merchants in your own town.

Minard's Liniment for Dandruff

PIMPLES ITCHED AND BURNED

Face Was Badly Disfigured. Cuticura Soap and Ointment Healed.

"Small red pimples and black-heads began on my face and my face was badly disfigured. Some of the pimples festered while others scaled over and there were places where the pimples were in blotches. They used to itch and burn terribly. I saw an advertisement for Cuticura and I tried them. They stopped the itching and burning and I used four cakes of Soap and three boxes of Ointment which healed me." (Signed) Miss V. A. Haynes, Stormont, N. S., Dec. 26, '18.

Soap 25c, Ointment 25c and 50c. Sold throughout the Dominion. Canadian Depot: London, Limited, 24 St. St., Montreal.

Japan is Good Market

Is Chief Buyer In East Of Canadian Goods.

Canada's chief market in the Far East is Japan, according to statistics published in the weekly bulletin of the department of trade and commerce.

The principal commodities exported to Japan last year included a million dollars worth of unbleached sulphite wood pulp, and three-quarters of a million dollars of bleached; over half a million dollars in fine nickel and zinc spelter, and 7,549 tons of iron and steel bars and rods. Douglas fir square timber, dry salted herring, asbestos, ammonium sulphite, rails, lead in pigs and wrapping paper are among the other principal items.

Prize Sheep From Royal Ranch.

The Prince of Wales is exhibiting his Shropshire shire from his ranch at High River at the Western Canadian fair this summer. Already they have won many Alberta ribbons.

"COLD IN THE HEAD"

Is an acute attack of Nasal Catarrh. Those subject to frequent "colds in the head" will find that the use of HALL'S CATARRH MEDICINE will build up the nasal and cranial sinuses and colds repeated attacks of Acute Catarrh may lead to chronic conditions.

HALL'S CATARRH MEDICINE is taken internally and acts through the blood on the mucous surfaces of the system, thus reducing the inflammation and assisting Nature to effect a permanent cure.

All Druggists. Circulars free.

F. J. Cheney & Co., Toledo, Ohio.

Against Too Much Production.

Declaring that the present period of depression is due to the fact that workmen have produced too much, and that for this reason employers are requiring their workmen to "take a rest," Alexander Howes, President of the Kansas Miners' Union, advised the laborer not to "produce too much or you may produce yourself out of a job" in a speech at Kanstis City recently before an audience of laborers.

Time Has Tested It.—Dr. Thomas' Electric Oil has been on the market upwards of fifty years and in that time it has proved a blessing to thousands. It is in high favor throughout Canada and its excellence has carried its fame beyond the seas. If it were double the price it would be a cheap liniment.

Australia Gets Busy.

Australia announces a new colonization plan which has for its campaign slogan "a million farmers for a million farms for Australia." Canada has the room and needs the population on its untouched acres. Is the Antipodean Commonwealth to get the cream of British peoples?—Victoria Times.

MOTHERS!

WATCH YOUR TEETHING BABIES

THOUSANDS OF THEM DIE EVERY SUMMER

When the baby starts to cut its teeth, then is the time the poor mother suffers under the stress of great anxiety. The child's bowels become loose, and diarrhoea, dysentery, colic, cramp and all other bowel complaints manifest themselves; the gums become swollen, cankers form in the mouth, and in many cases the child wastes to a shadow and very often the termination is fatal.

On the first indication of any looseness of the bowels, give a few doses of

DR. FOWLER'S

EXTRACT OF WILD STRAWBERRY

and thus, perhaps, save your baby's life.

For the past 76 years "Dr. Fowler's" has been used by mothers for teething babies so you do not experiment with a new and untried remedy which might be dangerous to your darling's health.

Put a bottle put up by the T. Nibbinn Co., Limited, Toronto, Ont.

Charming Frock Of Swiss and Organdie

By Marie Belmont.

Among the sheer fabrics that are greatly liked for the dainty summer dress are organdie and dotted Swiss. When they are combined most charming creations are achieved. The model illustrated is fashioned from white organdie and Swiss that shows pink, yellow and blue dots on a background of palest blue. The latter material is chosen for the deep yoke, which is bound with pipings of white organdie. The lower part of the waist is of organdie. The belt has an inset of the Swiss, while the lower part of the tunic is fashioned from the dotted material.

Fur Seals Increase

Estimated That There Are 600,000 of These Animals Between Washington and Alaska.

After having been reduced in numbers from 2,500,000 to less than 125,000 through unrestricted slaughter, the great seal herd of the Northern Pacific has, under adequate protection, again increased until today it is estimated there are at least 600,000 of the valuable mammals between the coast of Washington and the icy shores of Alaska. This year Indians expect to capture 2,000 seals. The value of the skins taken since 1917 is about \$500,000.

How to Fight Wheat Sawfly.

Advising the best methods to be followed in combating the wheat stem sawfly which has made considerable inroads in the crops in some districts this year, a bulletin has been published by the field crops branch of the Saskatchewan Department of Agriculture. Stubble burning or deep fall plowing are recommended to prevent infestation in subsequent crops.

The publisher of the best Farmers' paper in the Maritime Provinces, in writing to us, states: "I would say that I do not know of a medicine that has stood the test of time like MINARD'S LINIMENT. It has been an unfailing remedy in our household ever since I can remember, and has outlived dozens of would-be competitors and imitators."

Praise For Lord Byng

London Daily Telegraph Prints Laudatory Article on New Governor-General.

In a laudatory article on Lord Byng of Vimy, Canada's new Governor-General, the London Daily Telegraph remarks that whatever differences there may be between him and his immediate predecessor, both he and the Duke of Devonshire might well be chosen as typical English gentlemen.

"The Dominions inheriting all that is good in our traditions," says the article, "without the material disadvantages of the old world, have perhaps an easier task than we, but within the Empire we are all one people, and no Canadian will watch with more pride the prosperity and happiness of Canada under Lord Byng's governorship than the citizens of the Old Country."

Seaweeds do not obtain nourishment from the soil at the bottom of the sea, but from the matter contained in sea water.

Minard's Liniment for sale everywhere.

Colony For Ex-Soldiers

May Form Colony of Britishers in the Lillet District.

A report has reached Montreal of a meeting held in London, England, to discuss the possibility of forming a colony of ex-officers, men and their families in the Lillet district of British Columbia. It is estimated that 30,000 acres would be taken up by the colonists and developed under the auspices of a company, half the capital stock of which would be subscribed for on a regular investment basis by shareholders, while the greater part of the remaining half would be issued to intending British settlers.

Scotland's Census.

The census gives Scotland a population of 5,882,157, being an increase of only 120,000 over the record of 1911. The war has had on Scotland's population, the number of men taken, and not coming back, having been large. Emigration also kept down the numbers. Some of the counties lost to swell the population of Glasgow and its neighbor cities, a condition that is duplicated in other countries, where the city draws from the country and the factory from the farm. It will be well for the race when the process ends.—The Montreal Gazette.

FREQUENT HEADACHES

A Sure Sign That The Blood Is Watery and Impure.

People with thin blood are much more subject to headaches than full-blooded persons, and the form of anemia that afflicts growing girls is almost always accompanied by headaches, together with disturbance of the digestive organs. Whenever you have constant or recurring headaches and pallor of the face, you know that the blood is thin and your efforts should be directed toward building up your blood. A fair treatment with Dr. Williams' Pink Pills will do this effectively, and the rich, red blood made by these pills will remove the headache.

More distance to the health are caused by their blood than most people have any idea of. When your blood is impoverished, the nerves suffer from lack of nourishment, and you may be troubled with insomnia, neuritis, neuralgia or sciatica. Muscles subject to strain are under-nourished and you may have muscular rheumatism or lumbago. If your blood is thin and you begin to show symptoms of any of these disorders, try building up the blood with Dr. Williams' Pink Pills, and as the blood is restored to its normal condition every symptom of the trouble will disappear. There are more people who owe their present state of poor health to Dr. Williams' Pink Pills than to any other medicine, and most of them do not hesitate to say so.

You can get Dr. Williams' Pink Pills through any dealer in medicine or by mail at 50 cents a box or six boxes for \$2.50. Write to Dr. Williams' Medicine Co., Brockville, Ont.

Lime in Agriculture

Use and Misuse of Lime and Results From Detailed Experiments.

The use of lime in proper quantity, in proper quality, and the proper time will prove beneficial to most soils. Used otherwise, its effects are the reverse. That there may be no lack of knowledge on the subject, there has been issued by the Department of Agriculture at Ottawa, a revised edition of a bulletin, entitled "Lime in Agriculture," in which the Dominion Chemist, Dr. F. T. Shutt, has dealt comprehensively with the subject. From this bulletin it is learned that there are several classes of lime, such as quick lime, burnt lime, caustic lime, stone lime, etc., also that limestone of excellent quality is to be found in many parts of Canada, especially in the east and at some points in British Columbia. Some exists in Manitoba in the vicinity of Lakes Winnipeg and Winnipegosis. Otherwise there is none available on the prairies. What is known as lime kiln-refuse is sometimes sold as "Agricultural Lime," but the advice is tendered that purchases should be made only on analysis as to the percentages of quick lime, carbonate of lime, etc., present. The chief objects of the application of lime, or carbonate of lime, are the neutralization of sourness and the improvement of the mechanical condition of soils. The characteristic of the soils that should be treated are pointed out and the influence of lime explained. The comparative values of the different kinds are set forth as well as the methods of application. Attention is given to the use and misuse of lime and results from detailed experiments. A table shows the composition of limestone found in fourteen places in New Brunswick, nine in Quebec, six in British Columbia, nine in Nova Scotia and ten in Ontario. Prince Edward Island is also shown to have deposits.

Our slogan for the coming year should be, "Buy at Home." Add to your own and your neighbor's prosperity by keeping the money circulating in our own district.

Think these Points Over with Care

They may apply to you. Beecham's Pills have been, for seventy years, used by thousands of people and are today considered very useful in safeguarding health.

Beecham's Pills help to overcome disorders of the stomach, liver and bowels, prevent biliousness, constipation, indigestion, sick-headache.

They keep clear the complexion and help to purify the blood. Consider well and take

Pouce Coupe Oil

Imperial Oil Company Struck A Flow of Oil at a Depth of One Hundred and Eighty Feet.

Authentic news is received that the Imperial Oil Company has struck a flow of gas and oil at a depth of one hundred and eighty feet at Rollo, on the Pouce Coupe River, in the Peace River country. On a visit to the well, oil was being forced into the well by gas and the bubbling could be heard at some distance away. Experts state that the body from which the oil is being forced will be reached in less than sixty days, probably at a depth of seven hundred feet. Samples of the oil indicate it to be of a very high grade.

Swede Banished For Disloyalty.

An Indian, named Chatto Padayaya, has been refused permission to re-enter Sweden after a visit to Berlin. The Prime Minister stated that the object of Padayaya's stay in Sweden was to carry on propaganda for the separation of India from the British Empire.—Reuter.

New B.C. Industry.

The National Industries Corporation is about to commence construction of a large manufacturing plant on Industrial Island, B.C., where rivetless slide blades will be made. Knives will be manufactured for all standard grain and hay cutting machines.

Many people are almost crippled with corns. But it is needless suffering which can be speedily ended with Holloway's Corn Remover.

Will Build More Grain Elevators.

It is announced that Alberta Pacific Grain Company will build a number of new grain elevators in the Peace River district.

BOOK ON DOG DISEASES AND HOW TO PREVENT THEM. Mailed Free to any Address by the Author, H. CLAY CLOVER, CO., INC., 115 West 14th Street, New York, U.S.A.

ASPIRIN

Only "Bayer" is Genuine

Warning! Unless you see the name "Bayer" on the package or tablet you are not getting Aspirin at all. Take Aspirin only as told in the Bayer package for Colds, Headache, Neuralgia, Rheumatism, Earache, Toothache, Lumbago and for Pain. They will be following the direct and dosage worked out by physicians during twenty-one years and prove safe by millions. Handy tin boxes of twelve Bayer Tablets (register in Canada), of Bayer Manufacture Monocellulose of Salicylic Acid.

CLOVER LEAF NEWS

Everybody is preparing for harvest in this district. Two new headers have come in this district. Messrs. Brown and Wilson and J. C. Hess and Allen Bros. have purchased headers.

The rain of last week has done good to the gardens and late crops.

Sunday school has been organized at Clover Leaf together with Colholme, Sunday school next Sunday after the service.

Rev. G. A. Kettys, Chinook, will preach at Clover Leaf next Sunday at 11 a.m. The Sacrament of the Lord's Supper will be administered and Baptismal service after the usual service. Rev. Kettys will also preach at Cando school in the afternoon, and the Clover Leaf choir have been invited to be present and help in singing. Everyone with cars and can go and have room for one or two, be at Clover Leaf school.

Mr. and Mrs. G. Trogen and Mr. and Mrs. J. Davies have returned from a delightful camping trip at Buffalo Lake.

Mr. and Mrs. Glenn Robertson entertained the Finley Robertson and Ellis families at their home a week ago last Sunday.

Mr. and Mrs. Shiers and family were guests at the Brown and Wilson homes on Sunday.

Mrs. Wilson gave an afternoon tea on Tuesday in honor of the Misses Storey, when a few friends were invited.

A good many from this district attended the Chinook fair.

This is a busy week for the farmers with harvest. It is thought that the yield will be better than was expected.

Mr. and Mrs. N. Stewart have been entertaining the Misses Storey during the last week.

Tuxis Boys Win at Baseball

The Tuxis boys of Chinook have been putting up some splendid exhibitions of baseball. At the Oyen Fair our boys played the local team of that burgh and 'put it over them' to the tune of 13-2. At Youngstown Fair our boys took the field against the team of that town. It was a hard fought battle. In the seventh innings the score stood 9-9. Then the home team made a run and their supporters became jubilant, but the Chinook boys were right there with the goods when their turn came, and the game was finished with a score of 10-11 in favor of Chinook.

Personalities

Mrs. E. C. Stata returned home on Wednesday with her little son, Alfie who has been under the doctor's care in Calgary for the last month.

Eddie Upstone took first in the two running events at Youngstown on Fair day, the 100 yards and the 220 yards.

Mr. D. V. Boyer has been very ill for the last few days, but we hope before long he will take a turn for the better and we shall hear his cheery voice again in the office.

A number of Chinook's prominent citizens witnessed the sports at Youngstown on Tuesday.

Rev. R. B. Cumming, B.A., pastor of the twin circuits of Big Stone and Rainbow, will take the work of Rev. G. A. Kettys up on Sunday, Aug. 14. Mr. Cumming will preach at the following appointments: Crystal School 11, Crocus 3 p.m., and Chinook 7:30.

Memorial Service for the Late Dr. Rosenkrans

A very impressive memorial service was held for the late Dr. L. W. Rosenkrans in the Chinook church last Sunday evening when quite a large gathering were present to pay their last respects to the late Doctor. The pastor, the Rev. G. A. Kettys, conducted the service and took for his text: 1st John, Chap. 4, v. 10—"Herein is love, not that we love God, but that He loved us, and sent His Son to be the propitiation for our sin." At the close of the sermon Mr. L. Fowler, of Calgary, very beautifully sang a solo.

Mr. J. N. Key held the lucky number which won the new White machine, donated to the Chinook Agricultural Society, by the Banner Hardware.

M.D. of Sounding Creek

(Continued from page one)

the current year: Dobson, 7 mills; Devonshire, 9 mills; Earl Grey, 2 mills; Crystal, 13 mills; New Bliss 3 mills; Ryerson, 8 mills; Diamond, 12½; Dee Jay, 12 mills; Little Gem, 17½ mills; Wistaria, 11 mills; Naco, 20 mills; Marby, 8 mills; Marguerite, 12½ mills; Young Canada, 8 mills.

Some discussion followed regarding W. H. Turner's claim for gravel used on the north road. It was decided to reject Mr. Turner's claim as it stood, but to offer to arbitrate regarding the value of the gravel already used.

That in the event of W. H. Turner accepting the offer of the Council to arbitrate in the matter of gravel used by the municipality, G. S. Coad be appointed arbitrator for the municipality.

That bills passed by the finance committee be paid.

The following accounts were passed: Road Sheets—Div. No. 1, 1224.20; No. 2, 353.50; No. 3, 40.00; No. 4, 364.65; No. 6, 800.55. Support Your Home Paper.

What's a Guarantee?

Our idea of a guarantee is that the manufacturer who gives one—which hasn't any tags and loopholes—believes in his product.

So much so that he stands ready to make good any loss suffered by the purchaser through defective material or workmanship.

It's mainly because of the guarantee that goes with them that we are selling and recommending Ames Holden "Auto-Shoes."

Of course, we know they give the cheapest mileage too—that they are dependable tires for any make of car, anywhere. But it's the guarantee that we talk about most. It's the straight and clean-cut, without time or mileage limits. It shifts our responsibility on to the manufacturer and he lives up to every letter of it. Come in and let us tell you about the guarantee that goes with
